PROFESSIONAL SUMMARY

Senior Python Backend Developer with 5 years of experience building resilient microservices, optimizing PostgreSQL databases, and maintaining CI/CD pipelines in AWS.

SKILLS

Languages: Python, SQL, Bash

Frameworks: FastAPI, Django, Flask, SQLAlchemy

Databases: PostgreSQL, MySQL, Redis

DevOps: Docker, AWS (S3, EC2), CI/CD, Git, GitHub Actions

Testing: Pytest, TDD, Unit Testing

EXPERIENCE

Backend Engineer | CloudMatrix Systems (2020 - Present)

- Developed high-throughput REST APIs using Python, FastAPI, and PostgreSQL.
- Optimized database indexing and queries, cutting query execution times by 35%.
- Built automated CI/CD workflows using GitHub Actions and Docker containers.

Software Developer | DataStream Corp (2019 - 2020)

- Built Django web applications with relational database backends.
- Wrote extensive unit tests using pytest.

EDUCATION

Bachelor of Science (B.S.) in Software Engineering - University of Texas at Austin (2019)

PROJECTS

Async-DB-Broker: Lightweight connection pooler for PostgreSQL in Python.

Micro-Cache: Distributed in-memory caching wrapper using Redis.
